

Pro-Ration Pricing & Lifetime Data for SolarSync Products

What is lifetime data?

Lifetime data means that all data chargers are included in the price of SolarSync products. This isn't magic. There are data costs. We have simply rolled 10 years of data cost into the price. Approximately \$100 per year for 10 years represents data cost.

When your solar sync product last longer than 10 years, we continue to provide the data at no charge. For Solarsync products that are in service less than 10 years, we pro-rate the portion of data you did not use and apply it to your Solarsync replacement product. For simplicity, the pro-ration is on an annual basis. Any part of a year used counts as a full year. Pro-ration applies to new SolarSync purchases and is not refundable in cash.

The following scenarios could cause your Solarsync products to be in service for less than 10 years: Weather disasters, auto accidents, vandalism, cellular technology changes, hardware damages, etc. Regardless of fault, if the Solarsync product needs replacement, we will apply the pro-rated unused data toward the new product.

Our intent is to offer a simple pricing system, plus being fair to both our customers and SA-SO. Below is the pro-ration table for years 1-10.

Year	Solar Sync Costs Application	Pro-ration amount if product goes out of service this year.
1	Hardware costs + \$100 data	\$900
2	\$100 data	\$800
3	\$100 data	\$700
4	\$100 data	\$600
5	\$100 data	\$500
6	\$100 data	\$400
7	\$100 data	\$300
8	\$100 data	\$200
9	\$100 data	\$100
10	\$100 data	\$0
11+	\$0	\$0
