

# Trailer Mounted Radar Feedback Sign

## Features and Benefits:

- Ultra-light weight: 350 pounds / 550 pounds when crated
- Low shipping costs
- Efficiently managed by 1 or 2 people; Manual set-up - no equipment required
- Quickly folds into a low-profile unit for easy storage and towing
- Low wind resistance when towing
- Easily transported on a larger trailer, if necessary

## Programmable Radar Software Includes:

- Data tracker and statistics
- A/C and Solar-powered options available
- Bluetooth® accessible

# Trailer Mounted Radar Feedback Sign

SA-SO'S Trailer Mounted Radar Feedback Speed Sign provides all the benefits of the standard Radar Feedback Sign and includes an ultra-light weight trailer, making it easy to move, set-up, and tow. This efficient product kit helps calm traffic and reduce speeding by displaying the driver's current speed and notifying them of the legal speed limit in a particular area.

## Signage

The printed signs are MUTCD compliant, and the electronic 15" digital display portion of the sign can be AC- or solar-powered. To complete your set up: choose a speed limit aluminum sign, an electronic sign, and an aluminum "YOUR SPEED" sign. All trailers are uniform and standard.

## Corner Stabilizers

Easy up, easy down stabilizers provide a reliable platform to resist wind gusts.

## Solar and Electric Cabinet

All wiring contained within vertical structure.

## Standard 1 7/8" Ball Hitch

Employing a standard 1 7/8" ball hitch makes connecting the Trailer Mounted Radar Feedback Sign accessible to most vehicles. (Tailgate mural not included).

## Trailer Mounted Radar Feedback Sign Setup and Removal

Accordion fold design makes setup and removal of device as easy as 1, 2, 3.

The radar unit is protected when the device is in the safe travel configuration.

### Compact and Lightweight

The trailer weighs approximately 350 pounds independently and about 550 pounds when crated. Because of its low weight the Trailer Mounted Radar Feedback Sign is easily maneuvered manually by one or two people and causes little-to-no grass damage.
